

Winston Agustin

Langkaan 1, Dasmariñas, Cavite, Philippines • winston.agustin.ih@gmail.com • 09286874227

Full-stack developer who builds across the entire stack of web, mobile, and systems and ships production work, not tutorials. Backend and web development in PHP/CodeIgniter/Laravel, MySQL, JavaScript, and React; mobile development spanning native Android (Kotlin, Java) and cross-platform apps in Unity, Godot, React Native; systems-level work in Bash, PowerShell, Python, and C#, including native Qt/QML application development. Designed and deployed a genetic-algorithm-based scheduling engine with Gemini API-powered AI evaluation for a live production system. Comfortable administering Linux and Windows environments, working with AWS fundamentals, and debugging problems other developers hand off. If it needs to be built, automated, or fixed, I can do it.

EXPERIENCE

Leentech Network Solutions Inc.

Backend Developer Intern.

General Trias, Cavite

Jun 2024 – Aug 2024

- Performed website migration and duplication for company and client sites
- Built a PHP-based LMS web application (Startup Lab Academy) using CodeIgniter, MySQL, and cPanel
- Backend development: database design, system integration, and core feature implementation (dashboards, instructor management, admin controls)
- Debugged and tested application modules to ensure system stability and performance
- Collaborated with foreign clients for changes and suggestions
- Managed deployment processes and server configurations via cPanel

EDUCATION

Lyceum Of The Philippines University – Cavite

Bachelor of Science in Computer Science

General Trias, Cavite, Philippines

August 19, 2026

Thesis: ATLAS (Advanced Thesis Logistics and AI System) — a web-based PHP/MySQL thesis and defense management platform built for LPU-Cavite. Features a genetic-algorithm-based defense scheduler and Gemini API-powered AI evaluation support.
